# WIZEYEMBN BUSINESS NOW

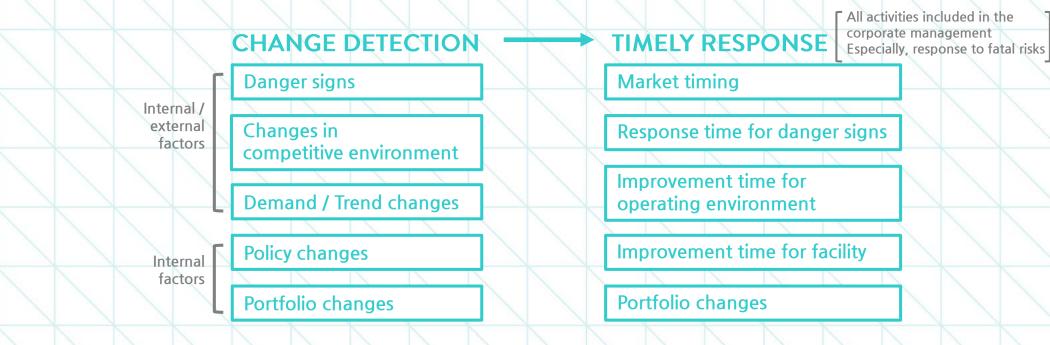

# **01.** TIME FOR CHANGE

### "Why do business impacting incidents happen so unexpectedly?"

Why is getting a good perspective of business implications caused by changes so difficult?

### When is the 'right time' to act?

WIZEYE<sup>™</sup> BN

Only if there are ways to instantly see any symptoms, it will be possible to set counter measures … However, placing the right resource into the right place is not easy as it sounds.

### How much of resources and where to ?? !!

#### **Resource Management**

Size and competitiveness of HR input

**Investment Plan and Scale** 

Utilization and productivity of facility

**Investment Object** 

**Role of HR input** 

Positioning

**Products** 

WIZEYE<sup>™</sup> BN

### "Once things slips out of the sight •••

Money is leaking … Inventory is piling up… Customers are leaving …

Employees are quitting...

wizeye

B

If you can see signs of any business risks early-on & be able to find root causes, setting successful counter measures should not be difficult.

# 02. PLATFORM APPROACH

#### **BusinessNow Key Point**

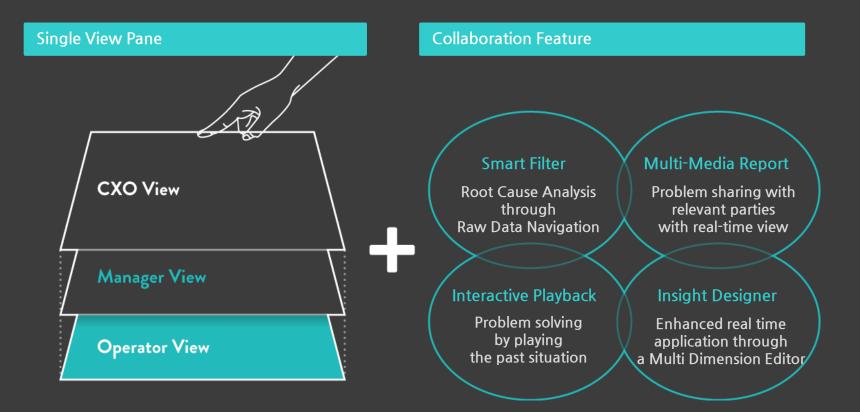

WIZEYE collects and analyzes the information related to the risk we identified and provides us the Insight, which will intuitively know the causes and signs.

The definition of risk associated data

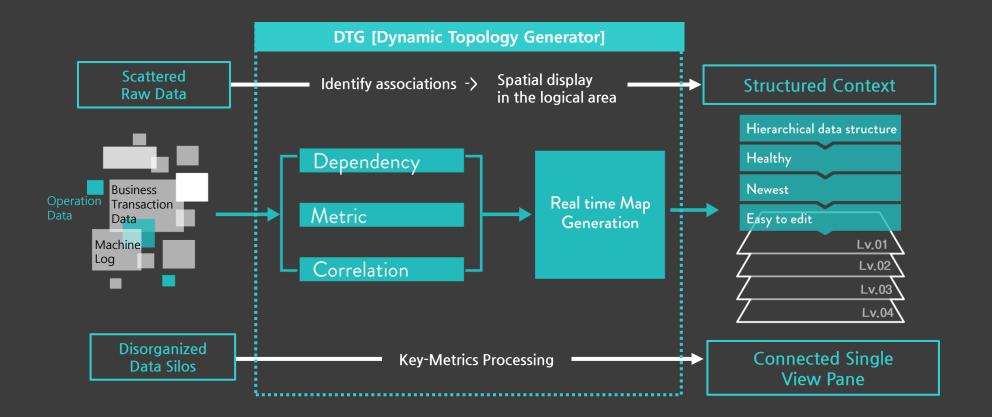

#### Visualization

The efficiency of collaboration will be improved dramatically, by communicating from your organization's management to field representatives via a Single Pane View.

#### **Hierarchical Structure**

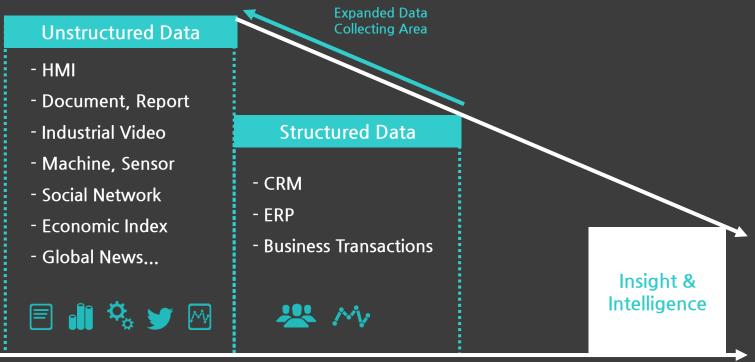

WIZEYE's Dynamic Topology Generator (DTG) provides a single, unified UX that can identify a Business Context by connecting the scattered data.

wızeye™ <mark>BN</mark>

#### **Expanded Data Collecting Area**

Have you thrown away the data for ease of analysis? Then, you've been throwing away the real value of data.

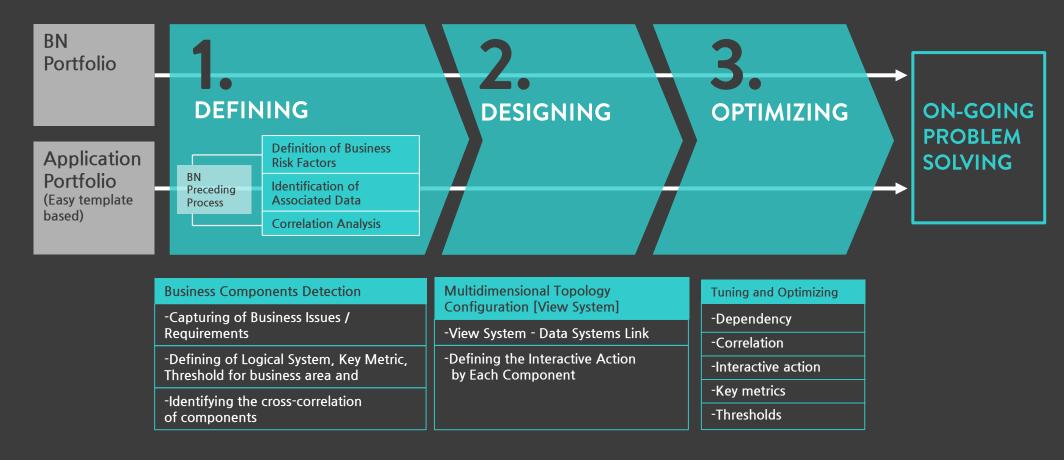

WIZEYE Visualization Value

# 03. IMPLEMENTATION METHODOLOGY

#### **BusinessNow Implementation Methodology**

WIZEYE's Implementation Methodology, [Draw & Run] is the template-based approach implemented through the World Best Practice. It accelerates the real-time collaboration among departments by demonstrating the relationship between the Application Portfolio and Service Portfolio on the multidimensional space immediately.

# 04. BUSINESS DEMO
